Summary

Computer Science undergraduate (Class of 2026) passionate about **web development**, **cybersecurity**, and **system-level programming**. Hands-on experience building full-stack applications, command-line tools, and microservices.

Education

B.Tech in Computer Science & Engineering, Jorhat Engineering College | 2022 – 2026

Experience

SDE Intern & Team Lead: *Rablo.in (Remote)* • Mar 2025 – Present

- Led frontend system design using **Next.js**, **Redux**, and **SCSS**
 - Integrated backend APIs with a dynamic UI to enable full-stack features
 - Mentored 3+ teammates, conducted PR reviews, and enforced Git best practices
-

Technical Skills

Languages: Go, JavaScript/TypeScript, Python, C/C++, Java

Backend: Node.js, Express.js, REST APIs, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Appwrite, Prisma ORM

Frontend: Next.js, React, SCSS, TailwindCSS,

Tools: Git, JWT, Linux, Docker, Bash

Projects

- [StoreDoc](#) (Next.js + Appwrite, Feb '25): Secure file management with OTP-based auth & dashboard analytics.
 - [VaultGuard](#) (Typescript + Docker + Prisma, June'25): A microservices based platform that enables users to safely share their financial data with trusted fintech applications.
 - [HTTP Server in Go](#) (Aug–Sep '24): Built a basic HTTP server to deepen understanding of web protocols.
 - [CLI shell in Go](#) (Mar–May '24): Unix-like mini-shell with I/O handling and process control.
 - [Campus Security System](#) (MERN, Feb '23): QR-based visitor tracking & campus map; won 1st prize at NITS 6.0 Hackathon.
-

Certifications

- [Google Cybersecurity Certification](#)
